New application of:

Inventor(s): Robert Sobol et al.

Title: A method for variable contrast mapping of digital images

THE ASSISTANT COMMISSIONER OF PATENTS  
Washington, D.C. 20231

PETITION TO ACCEPT PHOTOGRAPH(S) AS DRAWING(S)  
(37 C.F.R. § 1.84(b))

1. Petition is hereby made to accept photographs (color prints) in this case.
2. Submission of photographs:  
3 copies of each of 4 color prints are submitted herewith.
3. The reasons why photographs (color prints) are necessary in this case are as follows:  
The only way to show the subtle improvement in the color image reproductions between this new method of mapping a large illumination dynamic range, is to show a comparison of color images using the old methods and a color image using the new method. Two of the color image reproductions are reproductions that have been created using older methods of mapping images with a large range of illumination intensities. Two of the color image reproductions were created using the method of the current invention to show how much better the new method preserves the visual impact of the original scene.

4. The petition fee (37 C.F.R. § 1.17(i)) is paid as follows:

Please charge the petition fee of \$130.00 to Account 08-2025.

A duplicate of this petition is attached.

Please charge Account 08-2025 for any fee deficiency, or credit said Account for any overpayment.

Respectfully submitted,

by 

Steven L. Webb
